YNHALD
DETECT & CARE

SUPPLIER MONITORING AS A SERVICE

Continuously monitored. Instantly alerted.
Audit-ready proof.

With **Ynhald Care** we monitor your suppliers continuously, alert you to every important change with context and a recommendation, and deliver the evidence for audits, regulators and your customers. You get results – not software you have to run yourself.

HOW IT WORKS

01
List
Send us your suppliers – name and country are enough.

02
Monitoring
We check continuously across a range of official and public sources.

03
Alert
We report what matters right away – with context and a recommendation.

04
Evidence
You receive the evidence for audits, customers and regulators.

WHAT WE KEEP AN EYE ON

Registry & ownership	Management changes	Bankruptcy & insolvency	Financials & credit
Sanctions & PEP	Reputation & litigation	Cybersecurity	Certificates
Site & natural hazards	Country risk	Industry risk	Concentration risk
Recalls & warnings	ESG & supply chain	Sub-tier suppliers	Contingency planning

Registry, ownership and insolvency data cover Europe and the UK; all other areas apply worldwide.

WHAT AN ALERT LOOKS LIKE

CRITICAL Example · Sanctions

Sample Packaging LLC · new owner with 60%

Context: The new majority owner is on the OFAC SDN list. Under the 50 percent rule, your supplier is treated as blocked as well.

Recommendation: Hold payments and orders until cleared, involve compliance, line up alternatives.

WHAT YOU GET

✓ **No work for you.** We check, monitor and report – you decide.

✓ **Context, not data overload.** Every alert explains what it means and what to do.

✓ **Targeted, not questionnaire overload.** We only ask suppliers for missing, important information.

✓ **Audit-ready evidence.** ISO, GMP, MoCRA, SOC 2, retailer and customer requests.

✓ **Straight into your systems.** Evidence and recommendations as PDF, Excel or automatically into your ERP, ticketing or GRC system.
